I have one and I really regret that I bought it. It looks nice that's the only thing. The computer could handle most video playback but dropped some frames while watching a DVD rip and sputtered a bit when watching Hulu video in full screen mode. I will need to reinstall an operating system HP wanted \$81 for a recovery pack. How do I get a copy of Windows 7 starter and reinstall it on this machine? There is not a Windows license # on the machine, but I believe it registered itself with Microsoft when it first booted up. I've been using win7 since beta release with xp drivers originally. Due to having sled 10 as standard! Bought win7 at release and didn't need to install any drivers all installed from disc or online update. [La La Land Download](#)

The system is reportedly more responsive under Windows 7 than Vista. But the computer wouldn't go to sleep properly. Windows Driver Download Center Hewlett-Packard: Supported OS: Windows 10 32 & 64bit, Windows 8. Which I had to buy myself. I have the 2133 since April this year now and if I didn't spend so much money on it (extra because of Vista) I would have already placed it under one of the caterpillar D8's here at my worksite. I bought it with Vista, when I contacted HP in one country they said it only ran on Linux while in the country where I worked they admitted that Vista wasn't good on the 2133 and I better downgrade to XP. Runs reasonably fast it does what I need it to do at a speed acceptable to me. These aren't full-blown PCs they are smaller units which work alongside main PCs. It performs worse than a Win98 desktop I have and HP did not want to help at all. But those are netbooks with the Intel Atom CPU. How does Windows 7 perform on a netbook with a VIA C7-M CPU? The folks at HP Mini Guide loaded up an HP 2133 Mini-Note to find out. 04 If you don't want to get frustrated and feeling sorry you bought it, better don't buy the 2133. cea114251b [Installing 3d Custom Girl Mods Body](#)
